CURRICULUM VITAE

Professional Profile

Healthcare staffing executive and business technology professional connecting commercial growth, financial discipline, and operational execution. Experience spans go-to-market strategy, conversion rate optimization, marketing automation, B2B sales, and systems development, supported by a foundation in scientific research and analytical problem-solving.

Professional Experience

Med Plus Staffing LLC

Executive Vice President | Company tenure Jan 2021–Present

Lead business operations, technology strategy, and commercial development for a Pennsylvania healthcare staffing agency. Connect recruiting, facility relationships, financial operations, and internal systems to support growth and reliable staffing delivery.

- **Direct cross-functional operations** across recruiting, scheduling, human resources, finance, and client services, translating business priorities into operating processes, clear responsibilities, and coordinated execution.
- **Develop go-to-market strategies** for facility acquisition and clinician recruitment, combining market research, targeted prospecting, service positioning, and conversion-focused digital experiences to strengthen business development.
- **Lead technology implementation and systems administration,** including Rippling recruiting workflows and Google Workspace processes, standardizing applicant intake, onboarding information, operational documentation, and collaboration between teams.
- **Drive financial discipline and receivables management,** reviewing aging accounts, resolving billing discrepancies, negotiating payment arrangements, and coordinating collections and creditor matters with financial staff and external counsel.
- **Own client contracting and onboarding,** negotiating commercial terms and translating facility requirements into documented workflows for staffing requests, credential submissions, scheduling communication, invoicing, and escalation.
- **Direct development of healthcare market intelligence,** combining CMS provider data, Pennsylvania facility records, ownership filings, and hiring signals to inform prospect prioritization, account research, and commercial risk assessment.
- **Develop automation and AI-assisted workflows** for research, data collection, document preparation, and operational reporting, turning fragmented information into structured resources that support management decisions.
- **Manage operational risk and executive escalations,** coordinating facility ownership transitions, contract continuity, credentialing requirements, insurance matters, and urgent client issues while maintaining responsive communication across internal teams and external partners.

Professional Experience Continued

Captivert
Owner and Marketing Automation Engineer | Jan 2019–Feb 2021

Zhivago Partners
Senior Performance Marketing Strategist | Feb 2020–Jan 2021

- Managed Google Ads campaigns for Revenue Growth Systems clients, aligning keyword targeting, campaign messaging, and landing pages with client go-to-market priorities.
- Optimized the journey from click to conversion through landing page development and A/B testing, with a focus on conversion rates and return on marketing investment.
- Implemented conversion tracking across Google Ads, Google Analytics, HubSpot, and connected marketing platforms to link campaign activity to leads, sales, and revenue.
- Refined keyword strategies, reduced wasted ad spend, and scaled stronger-performing campaigns using conversion and revenue data.

Cropolis
Co-Founder and Operations | Jan 2016–Jan 2021

- Researched needs for greater transparency in the farm-to-business supply chain and developed a go-to-market strategy for a farm technology marketplace.
- Implemented solutions using AngularJS and Google App Engine with a focus on human-centered design and access to local food.

The Guider Group
Solutions Manager | Nov 2016–Jan 2019

- Developed One Click Surveys and worked closely with IBM Watson bot technology and Sentiment as a Service technologies.
- Applied these technologies to drive B2B sales across the automotive, pharmaceutical, research, and AI software industries.

CertSpring
Project Manager | Nov 2016–Jan 2019

Niche.com
Sales Development | Apr 2016–Jul 2016

- Introduced K–12 charter schools to branding services through consultative outreach; documented sales strategies and prospective customer relationships in Salesforce.

Pittsburgh Bike Share
Field Service Representative | May 2015–Apr 2016

- Serviced a network of 50 stations and 500 bicycles during the nonprofit's first year; supported bicycle redistribution and deployment, diagnosed technical issues, and identified repair needs.

Research Teaching and University Leadership

University of Pittsburgh

Research Assistant in the Pruitt Laboratory | Jul 2012–Apr 2015

- Studied behavioral differences, task performance, division of labor, and productivity in animal societies using experimental and analytical methods.
- Maintained and propagated microbial colonies; wrote, reviewed, and revised manuscripts for peer-reviewed submission.
- Participated in a two-week field study of the social spider Stegodyphus dumicola in South Africa in August 2013.

University of Pittsburgh Student Health Services

President of Student Health Advisory Board | Aug 2013–Apr 2015

- Led an 18-member graduate and undergraduate advisory board serving as a liaison with Student Health Services; supported health programs and coordination of campus resources.
- Interviewed more than 100 prospective board members. Board membership began in January 2012.

University of Pittsburgh Department of Chemistry

Organic Chemistry Teaching Assistant | Aug 2013–Apr 2015

- Taught more than 100 students across five semesters of Organic Chemistry I and II; led recitations, developed review materials, and proctored and graded examinations.

University of Pittsburgh Office of Admissions and Financial Aid

Pitt Pathfinder | Jan 2012–Apr 2015

- Led recruitment tours, supported orientation events, and interviewed more than 500 prospective Pathfinder applicants in group and individual settings; helped train new hires.

Education

University of Pittsburgh | Bachelor of Science | April 2015

Neuroscience and Biological Sciences; minor in Chemistry. GPA 3.53.
